

S90 MOBILE PAYMENT TERMINAL

The PCI PTS online and offline certified S90 is a compact, secure and ruggedized payment terminal capable of processing payments anywhere a wireless connection is available. Equipped with a powerful CPU, large memory, long-lasting Li-Ion battery, and a high-speed thermal printer, the S90 is an ideal payment device for use in transportation and delivery services, airline in-flight services, parking services, mobile vendors, and any application where internet and telephone connectivity is unavailable. The S90 supports store-and-forward and multiple payment applications, making this a powerful solution for all business applications.

Key Features
